## MEMORANDUM

**TO:** Honorable Chairperson and Members  
Board of County Commissioners

**DATE:** July 8, 2003

**SUBJECT:** Ordinance relating to  
Chapter 19

**FROM:** George M. Burgess  
County Manager

This ordinance is a rewritten version of Chapter 19, a reorganization of code provisions from Chapter 33 and a brand new section that creates maintenance standards for business and commercial premises.

The reorganization of the Code involves the removal from Chapter 33 of sections dealing with items that include the storage of construction materials, flammable materials, rubbish, junk, bike racks, litter bins, informational signs and sign maintenance requirements and incorporates them into the rewritten Chapter 19. Team Metro already enforces these items therefore there is no new cost impact.

The new section on business and commercial premises maintenance standards incorporates some of the above items (bike racks, litter bins, sign maintenance) and creates new regulations for the maintenance of fences and walls, parking lots and the exterior condition of buildings, and the removal of litter from the adjacent swale areas. Team Metro will assess the number of complaints received and the impact of the added cases. The Department can accommodate a 5% increase in cases without a cost impact. If the impact exceeds that amount, the Department would have to determine how many additional compliance officer and case processor positions would be required to maintain existing levels of service.

The Board finds and determines that the neglect of property by property owners and the rapid, continuous growth and urban development of the unincorporated areas of this County require the reasonable and effective control and regulation of excessive growth and accumulation of weeds, and other certain plant life to the extent and in such manner as to cause infestation by rodents and feral animals, the breeding of mosquitoes and vermin, or to threaten or endanger the public health, or otherwise adversely affect the welfare of adjacent property or occupants. health, safety and welfare of the community. Further, the Board finds that the maintenance of exterior premises of all improved property serves a public purpose in keeping property operating in a safe, sanitary and litter-free manner to prevent neighborhood blight and the deterioration of neighborhood character which, if unchecked, would have deleterious effect on the quality of life and the economic vitality of Miami-Dade County.

Section 2. Section 33-15 of the Code of Miami-Dade County, Florida, is hereby amended to read as follows:

**Sec. 33-15. Junkyards; ~~[[depositing junk; characteristics of junk property; and]]~~ repair of automobiles in residential districts.**

~~[[ (a) — It shall be unlawful to deposit, store, keep or maintain or to permit to be deposited, stored, kept or maintained junk or trash in or on any lot, parcel or tract of land or body of water in any zoning district, except within a legally established junkyard; provided it is not the intent hereof to prohibit the deposit of trash or junk in a usual location for waste collection provided it is not or will not become, a nuisance and the same will be collected by Miami-Dade County or a County authorized commercial waste collector. ]]~~

>>(a)<< ~~[[ (b) ]]~~ No junkyard shall be permitted in a residential district. No junkyard shall be established or enlarged without a permit from the Department, and the permit shall not be issued unless the same has been approved by the appropriate zoning board, after public hearing.

- (1) Junkyards shall be surrounded by a solid wall eight (8) feet high, and this wall shall be of C.B.S. construction and painted and maintained in order to present a good appearance.

In lieu of a C.B.S. wall, an eight-foot-high cyclone-wire type fence with top rail may be substituted, such wire fence to be interwoven with wooden, metal or plastic strips to create a solid screening site barrier. If wire fencing is used, a two-foot concrete (on footing) or heavy sheet metal curb (imbedded at least two (2) feet in the ground) shall be placed immediately adjacent to and inside such fence to prevent runoff of oil, transmission fluid and other

contaminants onto adjacent properties or into adjacent waterways that may result from junking operations.

Whether a C.B.S. or interwoven cyclone-wire fence is used, all gates shall be of the cyclone-wire type, interwoven with wooden, metal or plastic slats in order to screen the interior of the yard when the gates are closed.

- (2) In addition, whether a fence or wall encloses the junkyard, an appropriate hedge made up of native tree or plant species such as southern red cedar or other species approved by the Department shall be planted outside the walls or fences, such tree or plant species to be not less than four (4) feet in height at time of planting, five (5) feet on the center and two and one-half (2 1/2) feet from the wall or hedge. In no event shall the junk or scrap be piled higher than the wall or fence unless the hedge around the entire site grows above the wall or fence and forms a solid screen; in that event the scrap or junk may be piled up to the height of the hedge.
- (3) All existing junk and scrap yards shall be made to comply to all of the foregoing requirements within a period of two (2) years from the effective date of the ordinance from which this section derives and if not so made to comply, they shall be removed and the use discontinued.

~~[(4) All walls, fences, interwoven material, curbs and hedges shall be continuously maintained in good condition and appearance and in such a manner that the purpose of screening and water runoff prevention is served.~~

~~(c) When evaluating property to make a determination as to whether articles deposited in any location other than a legally established junkyard constitute junk or trash, the Department shall consider the following:~~

- ~~(1) Whether the article has only nominal salvage value;~~
- ~~(2) Whether the article is not in sufficient repair to~~

~~perform its intended function; provided, however, that any motor vehicle which is at least twenty (20) years old and is licensed as an antique vehicle by the State of Florida as evidenced by a current license tag, decal or registration shall not be deemed to be included within the definition of junk property;~~

~~In making evaluations under (c)(2), the Director or his designated representative may require the owner to demonstrate the operability of this article;~~

- ~~(3) Whether the article is derelict and has been left unprotected as evidenced by growth of vegetation about the article, direct exposure to the elements, positioning of the article in other than an upright or operable manner, or vandalism. With respect to a motor vehicle, evidence under this subsection shall include removed or flat tires, partial or complete dismantling or removal of parts, broken glass, missing major parts, broken glass, missing major parts such as lights, doors, hoods or motor parts essential for the lawful, safe operation of the vehicle or other signs of deterioration;~~
- ~~(4) Whether the article lacks a current license tag, and/or decal and/or registration; and~~
- ~~(5) The length of time the article has remained in its present location and position.~~

- ~~(d) Junk property which would be visible, at ground level, from a street or other public or private property but for the concealment of such junk property behind a wall, fence, hedge or other plant material or by the use of plastics, fabrics or other materials to form a tent, curtain partition or similar makeshift structure or device, shall be subject to the same restriction that is applicable to junk property which is visible.~~

~~(e)]>>(b)<<~~ In residential zoning districts, a property owner or tenant on improved property having a principal building may repair or otherwise put into operative condition an automobile of his property, only if all of the following requirements are met:

- (1) The property owner or tenant owns the automobile being repaired;
- (2) The repair activity takes places only during daylight hours;
- (3) While under repair the automobile shall not be parked in front of the principal building on the property unless the side yard and/or the rear yard are not accessible; and
- (4) The work undertaken at the premises to repair or otherwise put the automobile into operative condition shall be limited to minor repairs only. The term "minor repair" includes any work which is completed within seventy-two (72) hours including, but not limited to, change of tires, replacement of batteries, change of oil, replacement of brakes and engine tune-up. Any other work, including work wherein the vehicle engine or transmission is removed or lifted from the vehicle for repair or replacement, >>or the vehicle is placed on blocks with the tires removed,<< is prohibited.
